

1st State of the Association Address

From the Office of the General Manager
January 1, 2023

Members of the Board of Directors, Mister Deputy General Manager and my fellow Eagles,

I asked the Board of Directors, two years ago, to grant me the liberty to present this State of the Organization report this year, and they have graciously done so. First, I want to thank God all mighty for ordaining our steps and our successes. Without him, nothing is possible, and we would not have been able to achieve what we have thus far. God has indeed been great to us, as I will share in this report.

We are assembled today, by the words of our constitution, which requires the General Manager's Office to communicate to you, my fellow legislatures, the state of the organization. As broad of a responsibility that is, it does not state the manner upon which it can be communicated. Communicating such a report to you verbally and written brings a significance to the Office of General Manager and binds our working relationship greater. Thank you my fellow Board members, for granting me the audience to be before you today, to not only report on the state of the Indian Forest Companies but to also lay before you proposals that I have judged necessary, based on data and wise counsel, to advance the Indian Forest Companies.

Within the last two years, our organization has achieved much. We successfully passed two resolutions, that I believe not only solidify the culture, but the future of the Indian Forest Companies Inc. We renewed our incorporation charter with the Secretary of the State of Georgia, thus becoming once again an active non-profit organization. Together we strengthened our principles, renewed our mission and vision, appointed new leaders but most importantly we've mapped out our direction for success. Therefore, Madam

Chairman, fellow Board members and Mister Deputy General Manager, it is my great honor to report to you today, that the State of the Indian Forest Companies Incorporated, is progressing and stronger than ever before.

As strong as we are and have become within the last two years, I dare to say that strength applied to the foundation. A housing structure is not sustainable unless its complete with walls and a roof. This year, we will spend time placing the walls up as we strive next to add the roof to our ladder of success. I urge each of you to join me, partner with me, pray with me, as we lead this expedition towards a new day for the Indian Forest Companies Inc.

Our vision is to change the culture. That doesn't just apply to the atmosphere, but to people as well. We desire to impact in a way that people who affiliate with us will change the way they operate, think and process decisions. It is therefore with this in mind that I lay before you in accordance with my constitutional authority and powers the following:

I am proposing the immediate acquisition of Brannon Hill Condominiums. I have submitted reports accordingly and I know we all did our research on this community. Communities like these are the reason why we exist. If we can't change the culture of this community, then why do we exist or why do we try. In days to come, I will lay before you a budget proposal, renewal plan and potential agents who will partner with us in order that we may achieve this great task and bring change to a crying culture for decades. My hope in this endeavor, is to use this community as the spark that builds the Eagles Housing Development Association, as the great hope it will be.
